# When *Unglued 2* Cards See Print

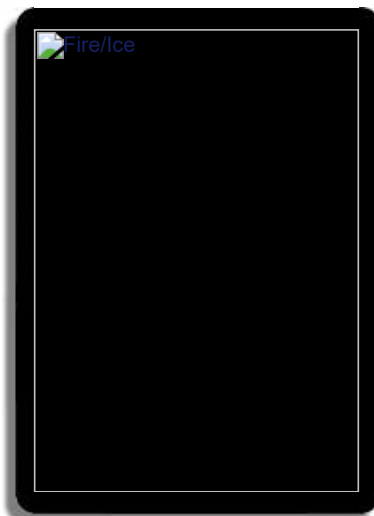

Magic Arcana  
 Wednesday, November 10, 2004

Some of **Magic's** crazier cards in the last few years originated in the *Unglued 2* design file. Since that *Un* set never made it to print, individual card designs crept their way into tournament-legal sets, disguised as legitimate mechanics but maintaining a -- let's say "slightly off" -- demeanor.

Let's look at some examples of cards that were originally slated for *Unglued 2*, but eventually made it (in slightly modified form) into other sets:

*Invasion's* [color-sensitive djinns](#), and Barrin's Unmaking

*Invasion* block's [split cards](#)

*Odyssey's* Atogatog
